

“Wot yer bin doin in your shed? Please show!”

Our last meeting was the tasking competition of the “Chuck Glider”. Which attracted our old mate Gary who competed under the guise of Paul! Who did rather well, coming third, no mean achievement considering the partisan attitude of many.

The event was won by Brian, who put up a very consistent series of flights and just beat Bill by one second. Laurie was not so lucky with his Canard, which flew very well but just a shade too quickly to give him the longest duration.

Unfortunately for me, the flying wing thing didn't work this time (it flew backwards) Chris told me the only time he tried it (the flying model dear) he had the same result!

So what's next, the other indoor meet, at the school on Saturday 26th March.

However, we are approaching SUMMER and so we can now look forward to lots of high pressure, low winds, and sunshine. So the summer meeting (on 2nd May 2011) is something to look forward to isn't it? We must all hope for good weather, as our next meeting in the hall, will be the last for this Season!

So, what are you going to bring to the field, when SUMMER is here? Can we see it on the 4th April? Go on, bring it along, and wet our appetites. There must be lots of new models just waiting for an airing, and it's well known to be infectious, it can only do good in the long run.

Can't think of anything else, the weather has been so awful, so I haven't been to the field for ages, to spy on any mishaps (even Steve is getting cautious with his heli's!)

Cheers Dears, Mike
