

Next meeting: 8 pm December 2nd 2013 Ugley Village Hall

It's the A. G. M. So all are welcome, and ALL the club jobs are up for grabs! So, now you have the chance to take that job!

The wind has been very unkind lately, but a few have ventured forth to brave the elements. Fortunately for me, one of those was Clive (who saved me from disaster) He got me out of trouble by making the Discovery obey him, instead of the wind. I tried afterwards, and found flying the model easier. "That's because I trimmed it out" He said! (I have not changed it since!), I have flown it quite a lot following His "Trim out" and can vouch for his touch.

The only trouble is, the model likes To trip over itself, because of the trike undercart, so "Gently Bentley is the order of the day! Clive also helped me with the MX2, which is a little too quick for me some times, and made the poor thing knife edge at high speed in the teeth of the gale that was blowing. It almost went as fast as his splendid little biplane!

The following Sunday I met Clives brother Andrew who had a gorgeous Corsair which I was hoping to see in the air! But, he had forgotten to bring batteries! So even if Clive had turned up to give a hand, it could have been difficult! Anyway, Andrew was due to go to a party, and I hope he made it in time!

So, it is time for the A.G.M. When all the club jobs will be fought over with bog eyed excitement! Also it is RAFFLE time, and the prize is an Acrowot (Kit) which is well worth the loose change you keep for such occasions!

There is a lot to discuss, as the club moves on, so please make an effort to support the club, and even take on a job!

Cheers Dears, Mike
