

Let's hope for a good weather day, and eve!

Unfortunately our Scale Day had to be cancelled, due to bad weather, much to the chagrin of Alan, who was looking forward to entering his E.D.F Shark, which did him proud last time! Anyway, the new date for the event is Sat 21st September.

Bill is going to run another event which is a general class covering a wider range of models such as Vintage, Classic, Retro, to give an opportunity for a wider interest, and a chance for members to try something new. This new event called, say, "General Fly in". will take place on Saturday 14th September, and "Anything Goes" so now's your chance to tryout that new idea. Let's hope for a good turnout, to support Bill's efforts for the club.

Some one who HAS been making an effort recently is Jason who has achieved a "C" Jet qualification recently, to go with his fixed wing "C". Jason passed with flying colours, which shows that he PAYS ATTENTION to safety matters etc.

As a matter of interest, the only other fixed wing "C" qualifications held in the club are with Bill and Gary Peacock I think I'll concentrate on getting my engines to run properly! Not much success lately. A1an says darkly "well they are four strokes, and rather old!"

So, don't forget the "General Fly in" on Saturday 14th Sept. Also, the new date for the Scale Day which is Saturday 21st September.

The "Patch" doesn't seem to be getting a great deal of use recently, but the sunshine seems to bring blustery winds with it, although it doesn't seem to worry Bill's large petrol powered model, which just powers it's way across the sky

As there is not a lot of flying, there are less problems to put in a "Bent Wing Section!" which was quite popular a little while ago (I learnt in quantity.)

Cheers Dears, Mike
